Welcome to 7th Grade Math

Contact Information:

My name is **Rachel Kim** and I am your teacher for 7th Grade Math. Please feel free to reach me if you have any questions or need help with anything. I will do my best to respond to your message within 24 to 48 hours.

Skype Name: ahsonlineath

- Be sure to check the **Message Center** before starting class work.
- Check your **Class Calendar** for bi-weekly scheduled **Chat Sessions** and my "virtual office" hours.
- During my "virtual office" hours, you will be able to reach me on **Skype** if necessary. If I am not available, please leave a voice mail message and I will respond within 24 hours. However, your best method of contacting me is via the **Message Center**.
- Please make sure all assignments are done promptly. There **SHOULD NOT BE** any long delays in submitting work. If a long delay occurs, you will be contacted and will have to explain the delays.
- If you have any questions about an assignment please ask. **DO NOT** submit an assignment with blank answers; points will be deducted for this. Please ask questions first via the **Message Center**. Remember, am here to help you so take advantage of it.

Good Luck with your studies!

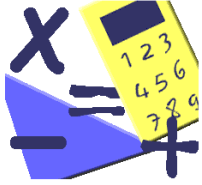

Course Objective

This course is designed to assist students as they make the transition between the concrete subject of arithmetic and more abstract subjects like algebra and geometry. This is accomplished by working with variables, variable expressions, equations, inequalities, and formulas. Subjects covered in earlier math courses such as fractions, ratios, percents, exponents roots, and probability are studied in further depth for greater mastery. The students also explore basic algebraic concepts and skills.

The course is taught so that a wide range of abilities is challenged through riddles, puzzles, and more complex mathematical problems supplementing the daily coursework. In addition to the specific arithmetic, algebraic and geometric skills and concepts mentioned above, this course aims to develop students' ability to communicate technical information and mathematical knowledge, which places a heavy emphasis on the processes and reasoning to support answers as well as proper mathematical notation.

Course Menu

Displays the sections that contain Chapters, Assignments, Tests, Essays and Exercises and Worksheet

The screenshot shows a software interface titled "Course Menu". At the top, there is a header bar with the title and a double-left arrow icon. Below this is a section labeled "Chapters" with a folder icon and a minus sign icon. This section contains a list of 11 chapters, each preceded by a blue circular bullet point:

- Ch.1 - Welcome To Class
- Ch.2 - Decimal Patterns and Algebra
- Ch.3 - Statistics Analyzing Data
- Ch.4 - Algebra: Integers
- Ch.5 - Algebra Linear Equations and Functions
- Ch.6 - Fractions, Decimals, and Percents
- Ch.7 - Applying Fractions
- Ch.8 - Ratios and Proportions
- Ch.9 - Applying Percentages
- Ch.10 - Probability
- Ch.11 - Geometry and Measurements

Below the chapters list are four expandable sections, each with an icon and a plus sign icon:

- Assignments (document icon)
- Tests (bar chart icon)
- Essays & Exercises (pencil icon)
- Worksheets (document icon)
